LETTER OF TRANSMITTAL

SENATE COMMITTEE ON COMMERCE,
U.S. SENATE,
Washington, D.C.

DEAR COLLEAGUE: After the National Ocean Policy Study was authorized by Senate Resolution 222, the Study Committee determined that one of its initial thrusts would be directed toward a review of the adequacy of the national capability for ocean data management. To embark upon this review, the Study Committee requested the Interagency Committee on Marine Science and Engineering (ICMSE) to undertake a study and prepare a report setting forth the locations, principal contacts, capabilities, and resources of the facilities involved with ocean data and then to prepare a detailed report on all aspects of ocean data activities.

The document transmitted herewith is in response to the first request, listing all of the Federal Government agencies, state and regional facilities, academic institutions, and industrial marine-oriented companies actively participating in acquisition, processing, dissemination, and use of ocean data. It was prepared by ICMSE, working through the Environmental Data Service of NOAA and the Committee member agencies.

This reference document is intended for use by members of the Senate National Ocean Policy Study Committee as they review the adequacy of present institutional mechanisms for providing the comprehensive data base necessary for operations in the marine environment.

WARREN G. MAGNUSON,
Chairman, Committee on Commerce.
ERNEST F. HOLLINGS,
Chairman, National Ocean Policy Study.

MAY 23, 1972.

Subject: Statement of Interagency Policy for Marine Data and Information Management.

To: Associate Administrator for Marine Resources, National Oceanic and Atmospheric Administration, Department of Commerce.

At its May 11, 1972, meeting, the Interagency Committee on Marine Science and Engineering (ICMSE) endorsed the enclosed Statement of Interagency Policy for Marine Data and Information Management in order to further interagency cooperation in this area. The statement was prepared at the request of ICMSE by the National Oceanographic Data Center Advisory Board.

(vii)

LETTER OF SUBMITTAL

FEDERAL COUNCIL FOR
SCIENCE AND TECHNOLOGY,
INTERAGENCY COMMITTEE ON
MARINE SCIENCE AND ENGINEERING,
U.S. DEPARTMENT OF COMMERCE,
Rockville, Md., October 21, 1974.

HON. ERNEST F. HOLLINGS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HOLLINGS: I am transmitting with this letter the report on Ocean Data Resources requested of the Interagency Committee on Marine Science and Engineering in your May 10, 1974, letter.

With the establishment of NOAA in 1970, the National Oceanographic Data Center and National Climatic Center were united under NOAA's Environmental Data Service (EDS). Thus, the primary national data centers for ocean and atmosphere were joined in a single agency, as recommended by the Commission on Marine Science, Engineering, and Resources.

Recognizing that increasingly larger quantities of marine environmental data (and samples) were being collected, and that special attention would be needed to insure that these data would become fully available to secondary users, the ICMSE promulgated a Statement of Interagency Policy for Marine Data and Information Management in May 1972. The policy statement is included in the Appendix.

Today, EDS provides a national mechanism by which interdisciplinary environmental data collected by many agencies, private sources, and other nations are made available to the general user community once the initial collection purposes have been served.

The EDS marine data user community includes Federal agencies, State and local governments, industry, colleges and universities, regional environmental councils and commissions, the general public, and the international community. World Data Center-A, Oceanography, is co-located with the National Oceanographic Data Center, Washington, D.C.; (World Data Center-B, Oceanography, is located in Moscow, USSR). Recently, in addition to providing traditional data services, EDS increasingly has been called upon to contribute to the solution of such problems as the energy crisis. National efforts in this area are concentrated in the coastal zone, where efficient and effective planning, site selection, design, construction, and operation of all facilities depend heavily upon interdisciplinary, historical, or "baseline" data. Such data are also needed to predict and assess the impact on the environment of such things as accidental oil spills.

(ix)

Specifically, EDS has furnished detailed data and statistics on severe storm, ice, tsunami, and earthquake probabilities for the Council on Environmental Quality's Outer Continental Shelf Study for Gas and Oil Exploration off the Atlantic Coast and Gulf of Alaska; prepared comprehensive environmental descriptions for the U.S. Atlantic, Gulf, and Pacific coasts, and the Great Lakes for CEQ's Floating Nuclear Power Plant Study, as well as more detailed environmental descriptions for four selected Atlantic coast areas; provided environmental descriptions to the Bureau of Land Management pertaining to OCS oil and gas leasing off the South Texas coast; prepared an Environmental Guide for the U.S. Gulf Coast, containing detailed environmental profiles for seven potential Gulf Coast Deep Water Port sites, requested by the Corps of Engineers; compiled an Environmental Guide for Seven U.S. Ports and Harbor Approaches for CEQ to aid in selecting suitable supertanker terminal sites for the United States; and provided chapters on climate and weather for the Department of the Interior's Final Environmental Impact Statement, Proposed Trans-Alaska Pipeline, for both the marine route and the pipeline itself.

The Committee is pleased to present this report and looks forward to continued participation in the National Ocean Policy Study.

Sincerely,

ROBERT M. WHITE,
*Chairman, Interagency Committee on
Marine Science & Engineering.*

The need for a policy statement to lay the foundation for enhancing cooperative efforts among Federal agencies stems from recognition that increasingly larger quantities of marine environmental data and samples are being collected, and that special measures may be required to insure that these data and samples—and any derived information—become available to secondary users, that is, users other than those for whom the data and samples are originally acquired. Toward this end, the statement urges that agencies work actively to establish bilateral agreements with the Environmental Data Service of NOAA and the Smithsonian Institution; and that agency or departmental level marine environmental data, sample and information policies be adopted and promulgated to further the aims of the interagency policy statement.

It is recognized that several agencies and offices have in being policy statements generally consistent with that enclosed herewith, such as those of the Office of the Oceanographer of the Navy, the IDOE Office of NSF, and NOAA. Additionally, a few bilateral agreements exist or are being established, such as those between NOAA and a number of agencies, for example, NSF, EPA, and the Office of the Oceanographer of the Navy. Nevertheless, it appears that broader application of the principles of the policy statement is needed. Therefore, ICMSE supports and encourages the measures recommended in the policy statement and solicits your assistance in achieving this acceptance within the Department of Commerce.

ROBERT M. WHITE,
*Chairman (Acting), Interagency Committee on
Marine Science and Engineering.*

Enclosure.

A STATEMENT OF INTERAGENCY POLICY FOR MARINE DATA AND INFORMATION MANAGEMENT

The Federal Government, through mission-oriented activities of many of its agencies and bureaus, and through a variety of research and operational contractors, collects or causes to be collected large quantities of marine environmental data and samples. In addition to the purposes for which these data and samples were originally collected, they constitute a valuable national resource, the proper management of which is the responsibility of the Federal Government. Secondary users of these data, samples, and resulting information include agencies of the Federal Government; elements of State and local governments; industry; colleges and universities; regional environmental councils and commissions; the general public and international activities. To meet the requirements of these secondary users, both for the present and during the decades to come, it is essential that there be implemented a systematic procedure to assure that this resource is adequately indexed, documented, and cataloged in preparation for dissemination to the user community and is archived in such a manner that the data and samples are readily accessible to the users. Data and information that are acquired for a specific purpose but which are not then made available for dissemination to other users, for all practical purposes do not exist; therefore, they should be made available as soon as possible after they are collected or derived.

The Interagency Committee on Marine Science and Engineering (ICMSE),

Recognizing the development of the National Oceanic and Atmospheric Administration's family of national environmental data and information centers and of the Smithsonian Oceanographic Sorting Centers (SOSC),

Noting further the existing and developing Federal environmental data management policy statements and the interagency environmental data management agreements,

Endorses the concept and value of such policy statements and interagency agreements and

Strongly urges the members of ICMSE, as a matter of interagency marine science and engineering policy, to:

a. Work actively with the Environmental Data Service of NOAA toward establishment of bilateral marine environmental data management agreements which provide or identify the mechanisms and resources whereby marine physical, chemical, geological, geophysical and biological data or their inventories and indices are promptly and properly archived.

b. Work actively with the Smithsonian Institution toward establishment of bilateral agreements as to the mechanisms, procedures and/or resources whereby the data information on marine collections are properly archived and, as appropriate, biological and geological specimens are properly sorted, curated and managed for optimal utilization.

c. Promulgate within their agency, or at the departmental level if considered appropriate, a marine environmental data, sample and information policy which embodies the principles established above, identifies the procedures and responsibilities within the agency, or department, as to development and implementation of inventories and serves as a broad general policy framework for interagency data management coordination.

INTRODUCTION

This report on ocean data resources has been prepared in response to a request from the National Ocean Policy Study of the U.S. Senate to the Interagency Committee on Marine Science and Engineering. The report lists the locations, principal contacts, capabilities, and facilities involved with ocean data. While the request was directed toward information on Federal agency activities, similar information on State and regional activities, academic institutions, industry, and nonprofit organizations have also been included to provide a perspective in relating Federal ocean data activities within the overall national ocean data effort. It must also be noted that the report addresses itself primarily to data management activities; it does not include the significant efforts involved in the actual acquisition of ocean data through research and survey.

In compiling the list of industries and nonprofit organizations, 267 were selected from a review of some 600 marine-oriented organizations as representing significant capabilities in ocean data collection, processing, or analysis. Companies engaged primarily in hardware manufacture or sales are not included.

ABSTRACT OF FEDERAL AGENCIES' PARTICIPATION IN OCEAN DATA PROGRAMS

DEPARTMENT OF DEFENSE

Department of Defense ocean programs support both military and civil purposes. The programs of the Navy, the Defense Mapping Agency, and the Advanced Research Projects Agency are directed to meeting military requirements. The marine programs of the Army Corps of Engineers fall in the civil works category.

Navy ocean science, engineering, and operational programs are conducted at academic institutions, Navy research laboratories and installations, private research laboratories, and industrial organizations. The Navy participates in cooperative programs wherever possible and beneficial to Navy needs. This includes both domestic and foreign oceanographic programs where pooling of resources can provide results normally not available to a single agency.

Although the Navy is both producer and consumer of its own efforts in oceanography, it provides much of the data and technology used by the civil sector. Conservatively, about 90 percent of the Navy ocean program is unclassified and can therefore be made available promptly to meet civil requirements.

The Naval Weather Service Command provides oceanographic prediction services to military forces. Many of these services are adaptable to, and are used for, civilian purposes. The Naval Weather Service Command comprises four computer equipped Fleet Weather Centrals—Guam, Pearl Harbor, Norfolk, and Rota, each having areas of responsibility, within which each collects environmental observa-

tions, processes data, and provides oceanographic predictions and warnings. In addition, there are eight weather facilities which provide oceanographic services as required mainly in support of aviation operations or local staffs. Several facilities have special functional oceanographic responsibilities, for example, Suitland concentrates on ice formation. The hub, and central computer site, of Naval Weather Service Command is at the Fleet Numerical Weather Central, Monterey, which devotes a significant portion of its operations and resources to oceanographic predictions, particularly as related to anti-submarine warfare and national defense. Security considerations constrain a more detailed description of these functions here.

In fulfilling its oceanographic prediction responsibilities, the Naval Weather Service deals mainly with physical oceanography—temperature, salinity, motion, and other characteristics of the ocean. However, a significant number of the driving forces are atmospheric in origin. Therefore, it is possible to predict changes in selected ocean parameters by integrating the total exchange of heat and momentum occurring at the ocean/atmosphere interface. The Naval Weather Service, with a dual mission responsibility for both oceanographic and meteorological predictions, is structured and operates specifically to accommodate this interface solution.

The Naval Oceanographic Office (NAVOCEANO) conducts applied military oceanographic work to provide the fleet with operational environmental data. It has the responsibility for the acquisition of survey data and the related technology for the Defense Mapping Agency (DMA).

DEFENSE MAPPING AGENCY (DMA)

DMA has the responsibility for all DOD mapping, charts, and geodesy. Its Hydrographic Center produces marine charts and related products and publications for fleet and commercial use.

The marine science programs of the Corps of Engineers support coastal and Great Lakes investigations of water and related land resources. The broad spectrum of corps civil works responsibilities in these areas include comprehensive long-range planning, pre-authorization project development, design, construction, operation and maintenance of projects, and regulatory activities. Project purposes include navigation, beach and shore erosion protection, coastal flood control, water quality improvement and flow control, water-based recreation, fish and wildlife conservation and enhancement, floodplain management services, and other purposes authorized by law.

DEPARTMENT OF COMMERCE

Two agencies of the Department of Commerce, the National Oceanic and Atmospheric Administration (NOAA) and the Maritime Administration (MARAD), contribute to the Federal ocean program.

The basic missions of NOAA are the development, operation, and maintenance of a national system for observing and predicting the state of the atmosphere, rivers, and oceans, and the conduct of research and development that contributes to the exploration, conservation, and development of marine resources. Additionally, an essential part of the NOAA program is the development of the neces-

sary scientific understanding, technological capabilities, and support services required to carry out the foregoing missions.

NOAA's Environmental Data Service indexes, archives, retrieves, summarizes, analyzes, and disseminates environmental data. It provides environmental information services that support government, public, academic, and industrial users. EDS is comprised of the National Oceanographic Data Center, the National Climatic Center (marine climatology), the National Geophysical and Solar-Terrestrial Data Center (marine geology and geophysics, including seismology, gravimetry, and geomagnetism), the Environmental Science Information Center, and the Center for Experiment Design and Data Analysis. Six discipline-oriented world data centers (dating from IGY) are collocated with EDS data centers. EDS operates an Environmental Data Index (ENDEX) and Oceanic and Atmospheric Scientific Information System (OASIS).

NOAA's National Weather Service (NWS) acquires atmospheric and sea-surface data which are used to provide forecasts and warnings for coastal and offshore waters. These data are then archived at the National Climatic Center. The marine observations are obtained from the cooperative merchant ship program and from trained observers aboard Coast Guard ocean station vessels. Tide observations, for tsunami warning system purposes, are collected by the NWS observatories at Honolulu, Hawaii, and Palmer, Alaska.

NOAA's National Ocean Survey (NOS) provides nautical charts which are basic tools required for waterborne commerce, expanding marine industries, and recreational boating. Program activities include hydrographic surveying and the compilation, reproduction, and distribution of nautical charts, coast pilots, Great Lakes Pilot, and other publications. Ocean mapping, investigation, and services consist of the acquisition and dissemination in suitable form of scientific data necessary to support many types of marine activities. The products include charts depicting bottom topography, ocean currents, and other physical variables of importance.

NOAA's National Marine Fisheries Service (NMFS) seeks to strengthen the U.S. domestic and international economic position in marine fisheries in order to decrease dependence on fish imports, expand exports, and develop and preserve fish resources. The Service seeks to accomplish this by maintaining and increasing the productivity and competitiveness of the U.S. fishing industry and by effectively conserving and allocating fisheries resources of interest to the United States. The NMFS also has the responsibility to protect and conserve endangered species and marine mammals.

NOAA's National Environmental Satellite Service (NESS) manages and operates the national operational environmental satellite system, composed of earth-orbiting spacecraft equipped to observe and collect environmental data on a global basis. Images of the earth and clouds and measurements of radiation from the atmosphere and ocean surface are acquired and processed at the World Meteorological Center in Washington for application to weather, marine, hydrologic, and resource survey services.

NOAA's sea grant program is the only national instrument for carrying out cooperative programs in the coastal zone with State and

local governments, academic institutions, and industry, for the purpose of fostering marine resource development, technology, environmental research, education, and training, and advisory services. Its major activities include assisting coastal States to improve their ability to manage their coastal zones through research, education, and advisory services; facilitating the ability of private enterprise to explore for and utilize marine resources and engage in marine e-commerce and commercial recreational activities through technology development, identification of new or unutilized marine resources, and providing the information required for the solutions to socio-economic and legal problems; operating and managing a national marine advisory program to facilitate the transfer of information between researchers and users; and helping provide the skilled manpower required to meet national needs in marine activities.

NOAA's Office of Coastal Zone Management was established in 1973 to administer the Coastal Zone Management Act of 1972 (Public Law 92-583) which provides Federal grants and other support to assist the coastal States and territories in the development and implementation of management programs for their coastal zones. The Office also administers title III of the Marine Protection, Research, and Sanctuaries Act of 1972 that calls for the study and designation of marine sanctuaries for the purpose of preserving them or restoring them due to their conservation, recreational, ecological, or esthetic values.

Both of these major program components will require substantial development of scientific, technical, and cultural data and information. Some of the needed management data, information synthesis, and applied research will be generated by the States. Reliance upon existing and developing Federal data sources will also be significant.

Typically, the programs will include compilations of basic shoreline and near-shore data, base maps, satellite imagery, resource inventories, and environmental data summaries. Grants may also be used to initiate or continue technical studies to identify or assess resources, capabilities, mechanisms, alternatives, et cetera, in relation to achieving the objectives of the Coastal Zone Management Act.

NOAA's Environmental Research Laboratories' (ERL) oceanographic research program is conducted primarily by the Atlantic Oceanographic and Meteorological Laboratories (AOML) and the Pacific Marine Environmental Laboratory. Included are studies of the dynamics of the upper oceanic boundary layer, the role of internal waves in the overall dynamics of the water column, investigations of the open ocean and Continental Shelf characteristics of seismic sea waves (tsunamis), and investigations of current patterns. Marine ecosystem analysis programs are also a responsibility of ERL.

The Maritime Administration provides a broad range of programs for revitalizing the U.S. flag merchant marine so that it can meet this Nation's shipping needs for commerce and defense. MARAD collects, processes, and analyzes comprehensive data regarding the foreign world merchant fleet and the U.S. world merchant fleet. Fifty-two (52) elements of data are maintained.

The only aspects of these programs applicable to the ocean data study, however, are those directed toward gaining a better understanding of the nature of the ocean surface and the environmental effects on the operation and design of merchant vessels.

Assessment of oceanic data is performed at the Maritime Operations Data Center which is part of the National Maritime Research Center

at Kings Point, N.Y. This information will be used in connection with the research conducted at the Computer Assisted Operational Research Facility (CAORF). CAORF is also under construction at the National Maritime Research Center, Kings Point, N.Y., and provides a ship-bridge simulator for national use to identify and relate the vital human, operational, technical, and other factors which affect safety, economy, and environmental impact of maritime operations by measuring of human responses in a controlled marine environment.

The Maritime Administration through its concern in the control of vessel source pollution is supporting research programs relating to the collection of data and development of techniques for use in evaluating the distribution and baseline levels of hydrocarbons in the world's oceans. The Maritime Administration has conducted jointly funded research work with private industry and other government agencies to collect, measure, and analyze levels of hydrocarbons along tanker routes covering the Pacific, east, and gulf coasts, the Caribbean, the Mediterranean Sea, and the Persian Gulf. This type of research data will be used by the Maritime Administration in the formulation of standards for the control of ship-generated pollution.

NATIONAL SCIENCE FOUNDATION

The National Science Foundation supports basic and applied oceanographic research at academic, nonprofit, and industrial institutions, as well as in Federal agency laboratories. Seven offices within the Foundation fund research programs as well as provide support for the ships and equipment necessary to carry them out.

The International Decade of Ocean Exploration (IDOE) is the Foundation's major marine research effort. Its basic objective is to accelerate understanding and prediction of the oceans and their resources through support of large-scale, multi-institutional, international projects. Programs are in four areas: environmental quality, seabed assessment, environmental forecasting, and living resources.

DEPARTMENT OF TRANSPORTATION

The U.S. Coast Guard, maritime arm of the Department of Transportation, has as its main mission, safety of life and property at sea and the enforcement of maritime laws and treaties, particularly as they relate to pollution prevention and fisheries conservation.

The former mission includes search and rescue, aids to navigation, merchant marine safety, and recreational boating safety. Ancillary to and in support of both of the main missions are the collection of oceanographic data by ocean station vessels, oceanographic vessels, and polar icebreakers, the processing of such data, and the entire Coast Guard research and development program.

The research and development program goals are to apply the benefits of science and technology to Coast Guard missions and responsibilities, to improve service to the public, and to reduce costs. To achieve these goals, three major objectives have been identified. These are: (1) To increase the capacity of the national marine transportation system, (2) to protect and enhance the marine environment, and (3) to protect public safety at sea.

DEPARTMENT OF THE INTERIOR

The Department of the Interior obtains, processes, stores, and disseminates data that relate to the identification, evaluation, development, and use of the Nation's nonliving and recreational resources, including those of the coastal zone and seabed of the Outer Continental Shelf and adjacent marine areas. The nonliving resources include water for human and industrial use, as well as minerals and fossil fuels. The recreational resources include gamefish of the Nation's streams and lakes, migratory birds, waterfowl, and other wildlife in addition to the well-known recreational facilities encompassed by the National Park and Wildlife Refuge Systems.

Interior's U.S. Geological Survey (USGS) acquires and utilizes basic cartographic, geophysical, geological, hydrological, geochemical, and mineral resources data in support of its responsibilities for "classification of the public lands, and examination of the geological structure, mineral resources, and products of the national domain." Current marine efforts focus on gathering information about the Nation's Outer Continental Shelf in order to expedite efficient and safe production of oil, gas, and other energy resources. USGS continues traditional research and fact-finding activities that aim at evaluating: (1) The total offshore mineral resource base available to meet needs of the Nation's economy; (2) the nature of geologic environments and their hazards as they relate to coastal and offshore resource development; and (3) the quantities and quality of water available for use in the coastal zone, including amounts discharged to the oceans. In support of its activities, USGS maintains an integrated nationwide earth science computer system for processing, storage and retrieval of cartographic, water, and mineral resource data; and manages comprehensive referral services through its National Cartographic Information Center and Office of Water Data Coordination. In conjunction with regulatory responsibilities, USGS compiles and periodically publishes records of OCS oil, gas, and mineral production and revenues.

Interior's Bureau of Land Management (BLM) has responsibility for administration of the Outer Continental Shelf lease program, which includes the assembly of pertinent data and preparation of environmental impact studies. It supports baseline and monitoring studies by others to collect and process data that is not available through existing sources. BLM serves as the office of record for data and activities relating to the OCS leasing program.

The U.S. Bureau of Mines (USBM) has Federal responsibility for the collection, analysis, and dissemination of data relating to mineral supply and demand, both on- and offshore. It also conducts research on mineral recovery and processing and serves as the focal point in Government for associated data, including that applicable to offshore operations.

Interior's Fish and Wildlife Service (FWS) in support of its responsibilities for conservation of the Nation's wildlife and gamefish resources, has initiated a service to provide key biological information and technical assistance needed for more knowledgeable land and water use decisions. A portion of this program applies directly to the coastal zone, specifically to a better understanding of coastal ecosystem inter-

relationships, OCS mineral production, and the siting of deep-water ports and offshore atomic plants.

ENVIRONMENTAL PROTECTION AGENCY

The major mission of the Environmental Protection Agency (EPA) is to prevent, control, and abate pollution of our environment. EPA's marine science and engineering programs reflect the authorizing legislation within categories of environmental studies, engineering development, and regulatory activities.

In the category of environmental studies are programs that study: 1. The effects of pollutants on marine fish and wildlife, 2. fate of pollutants in the marine environment, 3. biological and chemical processes in the Great Lakes. EPA conducts comprehensive estuarine regional planning studies, and technical studies of pollution conditions in support of State agencies, and supports also a related data storage and retrieval system.

DEPARTMENT OF STATE

The Department of State, with the assistance of departments and agencies of the Federal Government possessing responsibilities relating to the oceans, formulates and implements U.S. policy in international ocean affairs. The Department conducts negotiations with foreign governments on international ocean affairs problems, both bilaterally and multilaterally, and within the forums of international organizations.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The Department of Health, Education, and Welfare ocean-related programs are concerned with supporting basic medical research using marine organisms, providing advice and assistance on marine health science affairs, and regulating the safety and wholesomeness of marine foods. The authorities for administering these activities are primarily the Public Health Service Act and the Food, Drug, and Cosmetic Act.

ATOMIC ENERGY COMMISSION

The Atomic Energy Commission (AEC) marine sciences research program is directed toward determining those environmental factors which influence the movement of radioelements through the marine environment, the possible means and rates of return of radioactivity to man through marine food webs, and basic ecological processes. Within this broad program are studies on biological, physical, and chemical oceanography, and studies related to operational activities such as the impact of waste heat from nuclear power stations on local ecosystems at such sites.

The AEC supports multidisciplinary studies of nuclear powerplant siting, including the environmental effects of such siting and subsequent powerplant operation. The research encompasses investigation of trace element cycling, modeling of water circulation, biological production, and the effects of waste heat on ecosystems.

The AEC also supports research in the world oceans. Advances have been made in subjects such as circulation rates within the mixed layer of the oceans, vertical microstructure in the oceans, and abyssal water circulation.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

The National Aeronautics and Space Administration's (NASA) oceanography-related activities are primarily concerned with finding ways that remote-sensing techniques, data relay techniques, and drifting buoy position location techniques can be combined with appropriate aerospace technology to satisfy the needs of Federal, State, and regional agencies for improved coastal-zone or open-ocean data acquisition and data collection systems.

As NASA has no operational role or mission in the discipline area of oceanography, NASA maintains a close cooperative working relationship with those Federal agencies that do have such roles and missions, to insure that NASA's oceanographic efforts are responsive to their needs. NASA not only looks to these agencies to define their requirements for data, but also seeks their active participation in the planning and conduct of experiments in the field.

SMITHSONIAN INSTITUTION

The marine science activities of the Smithsonian Institution involve the systematics and ecology of marine organisms and investigations of marine biological and geological phenomena. Support services are provided in sampling, sorting, identification, curation, and data management of natural history specimens.

The National Museum of Natural History (NMNH) maintains the largest collection of biological specimens and geological samples in the world. These collections are actively being studied by scientists and constitute an important resource for research on current and historical environmental conditions.

The Smithsonian Oceanographic Sorting Center (SOSC) is a service unit of the Smithsonian Institution operated by the international environmental science program. Acting as a central processing laboratory, SOSC receives, sorts, records, curates, and distributes marine as well as freshwater collections in order to efficiently and accurately make these collections available to specialists.

INTERNATIONAL ASPECTS OF DATA MANAGEMENT

Local, national, and regional oceanographic activities in and among foreign countries constitute a major and very important source of data. Data collected by these non-U.S. activities and acquired by the United States through various exchange arrangements are vital to insure worldwide coverage of oceanographic data corresponding to our Nation's concerns in the global environment.

The primary international mechanism for the centralization and international exchange of oceanographic and related environmental data is the World Data Center system. World Data Center A—Oceanography is collocated with the U.S. National Oceanographic Data Center (NODC) and this arrangement provides for a steady and

voluminous flow of contemporary data from foreign sources into the U.S. NODC data banks. Most data collected by international cooperative programs and experiments, such as, for example, programs under the Integrated Global Ocean Station System (IGOSS), International Decade of Ocean Exploration (IDOE), Global Atmospheric Research Project Atlantic Tropical Experiment (GATE), et cetera, and data acquired by international organizations such as the International Council for the Exploration of the Seas (ICES); are automatically deposited in the World Data Center system. In addition, much data are voluntarily deposited in the World Data Centers by International Oceanographic Commission (IOC) member nations under the "declared national program" concept.

NODC is further augmenting the flow of data provided to World Data Center A, through bilateral data exchange arrangements with national oceanographic data centers and oceanographic activities in over 25 countries.

The IOC Working Committee on International Data Exchange seeks to modernize, broaden, and expand international data exchange arrangements and to promote wider access to, and accelerate the flow of, data and information from data-collecting programs to data centers serving the international data user community. Through U.S. efforts in the working committee, the World Data Centers and the U.S. NODC will be able to acquire a greater variety of oceanographic data in more cost-effective formats as well as gain timely information on marine data holdings throughout the world.

I. FEDERAL OCEAN DATA FACILITIES AND CAPABILITIES

ATOMIC ENERGY COMMISSION

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
Associated Universities, Inc., Brookhaven National Laboratory, Upton, N.Y.	Dr. George H. Vineyard, director.	Data analysis, interpretation, storage, and dissemination in support of physical, chemical, biological oceanography, and fisheries research.	1.0	\$50
Argonne National Laboratory, 9700 South Cass Ave., Argonne, Ill.	Dr. Robert G. Sachs, director.	Data analysis, interpretation, storage, and dissemination in support of physical, chemical, and biological oceanography.	.5	25
Oak Ridge National Laboratory, Oak Ridge Operations Office, P.O. Box X, Oak Ridge, Tenn.	Dr. Herman Postma, director.	Data analysis, interpretation, storage, and dissemination in support of fisheries research and biological oceanography.	.1	5
Puerto Rico Nuclear Center, University of Puerto Rico, College Station, Mayaguez, P.R.	Dr. Lawrence Ritchie, director.	Data analysis, interpretation, storage, and dissemination in support of physical, chemical, biological oceanography, and fisheries research.	.5	25
University of California, Lawrence Livermore Laboratory, P.O. Box 808, Livermore, Calif.	Dr. Roger E. Batzel, director.	Data analysis, interpretation, storage, and dissemination in support of chemical and biological oceanography and geology/geophysics.	.5	25
Battelle Memorial Institute, Pacific Northwest Laboratory, P.O. Box 999, Richland, Wash.	Dr. Edward L. Alpen, director.	Data analysis, interpretation, storage, and dissemination in support of chemical and biological oceanography. Remarks: In addition to in-house ocean data activities, the AEC (through its Division of Biomedical and Environmental Research) expends approximately \$5,000,000 on research and surveys relating to marine radioactivity. These contracts, with both universities and private organizations, yield significant marine data which arrive in the public domain through the primary research journals and through data reports submitted to the National Technical Information Service. In fiscal year 1974, specific steps were taken to broaden the submission of data and data inventories to the Environmental Data Service in accordance with the ICMSE policy statement on marine science and engineering data.	1.0	50

DEPARTMENT OF COMMERCE/MARITIME ADMINISTRATION

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
Maritime Administration, Assistant Administrator for Commercial Development, Commerce Building, Room 4885, Washington, D.C.	Mr. Marvin Pitkin.....	Contract efforts are supported for the collection and analysis of ocean wave spectra data, and other marine data relating to naval architecture (ship design), arctic port development, etc.		
National Maritime Research Center, Kings Point, N.Y.	Capt. L. S. McCready, director.	Gather, process, and analyze data on crew accidents, ship collisions, grounding, and strandings. Directs operation of Computer Assisted Operational Research Facility (CAORF).		

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/ENVIRONMENTAL DATA SERVICE

Environmental Data Service, Washington, D.C.	Dr. Thomas S. Austin, director.	Administration.....		
Environmental Data Index (ENDEX), Environmental Data Service, Washington, D.C.	Mr. Christopher Nos, chief.	Marine science data referral.....	9.0	\$358
Center for Experiment Design and Data Analysis, Washington, D.C.	Dr. Joshua Z. Holland, director.	Collecting, processing, analyzing, and interpreting data from special observation programs.	40.0	1,034
National Climatic Center, Federal Building, Asheville, N.C.	Mr. William H. Haggard, director.	Marine meteorological data collection, processing, compilation, and dissemination, statistical analyses. Note: Resources include \$1,300,000 reimbursable services to Naval Weather Service and National Ocean Survey.	50.0	1,600
National Geophysical and Solar-Terrestrial Data Center, Boulder, Colo.	Mr. A. H. Shapley, director.	Geological and geophysical data collection, processing, compilation, and dissemination.	10.5	330
National Oceanographic Data Center, Washington, D.C.	Mr. R. V. Ochenero, director.	Oceanographic data collection, processing, archiving, analysis, and dissemination.	99.7	1,966
EDS/NODC Liaison Office, NOAA, P.O. Box 271, La Jolla, Calif.	Mr. Nelson Ross, Jr., liaison officer.	Data and inventory submissions, data services, Marine Advisory Service.	1.5	31
EDS/NODC Liaison Office, AOML/NOAA, 15 Rickenbacker Causeway, Miami, Fla.	Mr. John Sylvester, liaison officer.	Data and inventory submissions, data services, Marine Advisory Service.	1.5	28
EDS/NODC Liaison Office, Woods Hole Oceanographic Institution, Woods Hole, Mass.	Mr. George Heimerdinger, liaison officer.	Data and inventory submissions, data services, Marine Advisory Service.	.3	11
Environmental Science Information Center, Washington, D.C.	Dr. Joseph Caponio, director.	Administration/staff.....		
Oceanic and Atmospheric Scientific Information System (OASIS).	Mr. James R. Stear....	Computerized bibliographic information retrieval system for marine sciences.	5.1	163

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/ENVIRONMENTAL
RESEARCH LABORATORIES

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
Environmental Research Laboratories, Boulder, Colo.	Dr. Wilnot N. Hess, director.	Administration.....		
Atlantic Ocean. & Met. Laboratories, 15 Rickenbacker Causeway, Virginia Key, Miami, Fla.	Dr. H. B. Stewart, Jr., director.	Physical, geological, chemical oceanography including STD, current meter, acoustic and optical data analysis and modeling. Storm surge prediction; image enhancement.	16.0	\$512
National Hurricane Research Laboratory, University of Miami, Box 8265, 1365 Memorial Dr., Coral Gables, Fla.	Dr. R. C. Gentry, director.	Atmospheric and oceanographic data relating to hurricanes and storm surges such as temperature profiles, cloud physics data, and radar picture analysis.	10.5	490
Pacific Marine Environmental Laboratory, University of Washington, Seattle, Wash.	Dr. R. E. Burns, director (acting).	Chemical oceanography, physical oceanography including STD and current meter data. Tsunami propagation and run-up.	5.0	250
Joint Tsunami Research Effort, 2525 Correa Rd., University of Hawaii, Honolulu, Hawaii.	Dr. G. Miller, director.	Activities and resources are included under parent laboratory (PMEL) above.		
Great Lakes Environmental Laboratory, NBOC-1, Rm. 100, Rockville, Md.	Dr. E. Aubert, director.	Lake hydrology, chemical limnology, physical limnology, limnogeology.	5.0	250

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/NATIONAL ENVIRONMENTAL SATELLITE SERVICE

National Environmental Satellite Service, Federal Office Building 4, Suitland, Md.	Mr. David Johnson, director.	Administration.....		
Environmental Products Group, NOAA/NESS, Suitland, Md.	Mr. Russell Koffler, chief.	Development of satellite data products for operational ocean services.	3.0	\$100
Environmental Sciences Group, NOAA/NESS, Suitland, Md.	Dr. E. Paul McClain, chief.	Research, analysis and interpretation of satellite data for marine applications.	8.0	310
Field Services Division, NOAA/NESS, Suitland, Md. Stations at San Francisco, Kansas City, Suitland, Miami, and planned for Anchorage and Ann Arbor, Mich.	Mr. John Hussey, chief.	Specialists provide analysis and interpretation of satellite data for local/regional marine services. Four oceanographer positions established spring 1974; hires in progress.	2.3	47
Sensor Processing and Applications Division, NOAA/NESS, Suitland, Md.	Dr. John Leese, chief.	Development and maintenance of automated techniques for preparing, operational sea surface temperature data analyses and other marine products.	5.0	150
Visual Products Support Branch, NOAA/NESS, Suitland, Md.	Mr. William Plew, chief.	Preparation, storage, and retrieval services for satellite data archives.	1.0	15
Spacecraft Oceanography Group, NOAA/NESS, Suitland, Md.	Mr. John Sherman, chief.	Development of techniques for acquisition and processing of ocean data by remote sensing from aircraft and satellites.	5.0	356

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/NATIONAL MARINE
FISHERIES SERVICE

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
National Marine Fisheries Service, Page Building 2, Washington, D.C.	Mr. Robert Schoning, director.	Administration		
Associate Director for Resource Research, Page Building 2, Washington, D.C.	Dr. William Royce, director.	Administration/staff		
Atlantic Environmental Group, Page Building 2, Washington, D.C.	Dr. Merton Ingham, director.	Historical and Ship of Opportunity physical, oceanographic, and meteorological data analyses.	5.2	\$146
Pacific Environmental, c/o Fleet Num. Weather Cen., Naval Postgraduate School, Monterey, Calif.	Mr. James Johnson, director.	Historical and Ship of Opportunity physical, oceanographic, and meteorological data analyses.	9.0	247
Northwest Fisheries Center, 2725 Montlake Blvd. East, Seattle, Wash.	Dr. Dayton Alverson, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	8.0	230
Auke Bay Fisheries Laboratory, Post Office Box 155, Auke Bay, Alaska.	Dr. William Smoker, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	3.5	100
Southeast Fisheries Center, 75 Virginia Beach Dr., Miami, Fla.	Mr. Harvey Bullis, Jr., director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	4.4	125
Northeast Fisheries Center, Woods Hole, Mass.	Dr. Robert Edwards, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	6.0	144
Southwest Fisheries Center, Post Office Box 271, 8604 La Jolla Shores Dr., La Jolla, Calif.	Dr. Brian Rothschild, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	2.5	114
Honolulu Laboratory, 2570 Dole Street, P.O. Box 3830, Honolulu, Hawaii.	Mr. Richard Shomura, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	2.0	35
Atlantic Estuarine Fisheries Center, Pivers Island, P.O. Box 570, Beaufort, N.C.	Dr. Theodore Rice, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	4.0	127
Gulf Coastal Fisheries Center, Building 302, Fort Crockett, Galveston, Tex.	Dr. Joseph Angelovic, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	3.0	88
Middle Atlantic Coastal Fisheries Center, P.O. Box 428, Highlands, N.J.	Dr. Carl Sinderman, director.	Fishery catch and effort analyses. Biomass, plankton, primary productivity, and nutrient data analyses. Physical-chemical oceanographic data analyses.	.8	43

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/NATIONAL MARINE
FISHERIES SERVICE—Continued

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
College Park Fisheries Technology Laboratory, College Park, Md.	Mr. Harry L. Seagran, director.	Microconstituents. Contaminant data analysis and dissemination.	.8	\$22
National Ocean Survey, Rockville, Md.	RADM Allen Powell, director.	Administration		
NOAA Data Buoy Office, Mississippi Test Facility, Bay St. Louis, Miss.	Mr. James Winchester, director.	Collection and processing of environmental data from buoys for synoptic and archival use.	12 6.0	650
Office of Marine Surveys and Maps, Rockville, Md.	Capt. Robert Munson, associate director.	Staff		
Oceanographic Division		Collection, analysis, interpretation, storage, and dissemination of tidal, tidal current, and temperature-salinity-density data; statistical, harmonic, and nonharmonic analysis; interpretation for verified tide reducers for hydrography; establishment of datum planes; determination of type of tide; model verification. Storage and retrieval of tidal current and density data and results implemented both within NOS to support ongoing programs and at EDS (NODC) which provides public distribution. Dissemination by NOS is in the form of summaries, reports, bulletins, and published tables.	49.5	1,105
Marine Chart Division		Collection, analysis, interpretation, storage and dissemination of data required in the publication of navigation charts, coast pilot editions.	119.0	2,461
Coastal Mapping Division		Collection, analysis, interpretation, storage, and dissemination of aerial photography and horizontal control data required in the compilation of Florida boundary maps, shoreline manuscripts, storm evacuation maps, coastal inundation maps, chart topography, and for aerial current studies.	68.3	1,878
Lake Survey Center, 630 Federal Bldg. and U.S. Court House, Detroit, Mich.	Capt. Kenneth MacDonald.			
Water levels studies		Collection, analysis, interpretation, storage-retrieval, and dissemination of water level records in support of the Great Lakes navigation charting program, scientific and engineering studies. Dissemination is in the form of published summaries, tables, and reports.	10.0	220
Hydrographic processing		Collection, analysis, interpretation, storage-retrieval, and dissemination of sounding and related marine data required to produce a navigation chart and related publications such as Great Lakes Pilot.	14.0	210

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/NATIONAL MARINE
FISHERIES SERVICE—Continued

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
Atlantic Marine Center, 439 West York St., Norfolk, Va.	Rear Adm. Alfred C. Holmes, director.			
Hydrographic processing.....		Collection, analysis, and interpretation of sounding (depth), tides, horizontal control, and related records required to smooth plot and verify hydrographic surveys in support of the nautical charting program.	24.0	\$371
Coastal mapping (photogrametry).....		Collection, analysis, interpretation, and compilation of aerial photographic data into shoreline manuscripts for hydrographic survey smooth sheets and shoreline maps for chart topography, both in support of the nautical charting program.	46.0	669
Pacific Marine Center, 1801 Fairview Ave. East, Seattle, Wash.	RADM Herbert Lipold, Jr., director.			
Hydrographic processing.....		Collection, analysis, and interpretation of sounding (depth), tides, horizontal control, and related records required to smooth plot and verify hydrographic surveys in support of the nautical charting program. Note: NOS resources include 29.5 man-years and \$744,000 for reimbursable work.	25.0	505

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/
NATIONAL WEATHER SERVICE

National Weather Service, Silver Spring, Md.	Dr. G. P. Cressman, director.			
National Meteorological Center, Federal Office Bldg., No. 4, Suitland, Md.	Dr. F. G. Shuman, director.	Environmental data collection and preparation of basic weather and ocean analyses and forecast guidance for use by offices.	17.0	\$595
National Hurricane Center, P.O. Box 8286, Coral Gables, Fla.	Dr. N. Frank, director.	Environmental data collection for predicting tropical storm developments and movements and related effects, such as high seas and storm surges, and for the development of methods for predicting growth and movement of tropical storms.	22.0	561
National Weather Services, Observatories, Honolulu, Hawaii, Palmer and Adak, Alaska.	Director, International Tsunami Information Center, Honolulu, Hawaii.	Seismic and tide data collection and prognosis and dissemination of seismic wave (tsunami) watches and warnings on a regional, national, and Pacific-wide basis.	19.0	550
National Weather Service Forecast Offices (Marine) (23 offices located throughout the United States and Puerto Rico).	Director, Ocean Services Division, National Weather Service, Headquarters.	Environmental data collection, analysis, and prognosis and the dissemination of products on marine weather and waves for coastal and offshore areas and ice conditions for Alaskan waters and the Great Lakes.	68.0	1,653

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/
OFFICE OF COASTAL ZONE MANAGEMENT

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
Office of Coastal Zone Management, NOAA, Rockville, Md.	Mr. Richard R. Gardner, deputy director.	Most coastal states and territories are using OCM funds to collect oceanic and coastal zone data which may have national applications.		
Manned Undersea Science and Technology Office, Office of Marine Resources, NOAA, MR 6, Rockville, Md.	Dr. Donald Beaumariage, director.	M.U.S. & T. funds the lease of undersea platforms, research submersibles, and habitats for marine science missions with principal investigations from NOAA, universities supported by NSF, Sea Grant, and other Federal agencies. Data collected is in the form of photographs, scientist abstract data, special instrumentation results, and includes data on diving physiology and environmental monitoring.		

DEPARTMENT OF COMMERCE/NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION/OFFICE OF SEA GRANT

Office of Sea Grant, 6010 Executive Blvd., Rockville, Md.	Dr. Robert B. Abel, director.	The Office of Sea Grant recognizes the potential resource represented by data collected by Sea Grant researchers and, therefore, has procedures to assure that these data are adequately documented and cataloged. Following discussions between the grantee and an NODC representative to determine the documentation necessary to ensure meaningful interpretation by subsequent users, grantees are required to submit data inventories to NODC within 30 days after completion of each cruise or data collection phase, and submit the data within 1 year. Resources for data management are not routinely identified.		
NOAA Marine Advisory Service, Office of Sea Grant, Rockville, Md.	Mr. Howard Eckles, program manager.	See the Abstract of Federal Agencies' Participation in Ocean Data Programs and pt. III.		

DEPARTMENT OF DEFENSE (ARMY)

U.S. ARMY CORPS OF ENGINEERS				
Coastal Engineering Research Center, Kingman Bldg., Fort Belvoir, Va.	Col. James L. Trayers, director.	Coastal ecology; sand inventories; beach and coastal characteristics; waves, tides, and currents in coastal zone; inlet and estuary hydrodynamics.	90.0	\$3,600
Waterway Experiment Station, P.O. Box 631, Vicksburg, Miss.	Col. George H. Hilt, director.	Bathymetric surveys; waves, tides, and currents in harbors, estuaries; structural response to ocean dynamics.	125.0	5,000
Cold Regions Research and Engineering Laboratory, P.O. Box 282, Hanover, N.H.	Col. Robert L. Crosby, director.	Ice forces on structures and shorelines; ice and permafrost effects on navigation works.	10.0	200

DEPARTMENT OF DEFENSE (ARMY)--Continued

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
22 Coastal District or Division Offices of Corps of Engineers.	Col. John Parish, Jr., executive director/ CW.	Coastal zone bathymetry and topography, hydraulics of coasts, bays, estuaries, including waves, currents, and tides; channel and harbor surveys.	385.0	\$7,700
		Note: Because the data activities of the Corps are integral parts of project activities of complex nature, man-year and dollar resources invested in data activities are difficult to determine accurately. These figures are to be considered preliminary estimates.		

DEPARTMENT OF DEFENSE (DEFENSE MAPPING AGENCY)

Defense Mapping Agency, Hydrographic Center (DMAHC), Washington, D.C.	Capt. Scott Drummond, director.	Bathymetric data storage and dissemination; maintains the Bathymetric Library for the DMA/DOD.	8.0	\$145
Defense Mapping Agency, Aerospace Center (DMAAC), St. Louis, Mo.	Col. D. D. Hawkins, director.	Marine gravity data storage and dissemination; maintains the Gravity Library for the DMA/DOD.	5.0	65

DEPARTMENT OF DEFENSE (NAVY)

Chief of Naval Research, 800 North Quincy St., Arlington, Va.	Rear Adm. M. D. Van Orden.	Whereas these offices are principally administrative and/or management-oriented, the research contracts which they support generate significant quantities of ocean data. ONR offices have long been aware of their national marine data management responsibilities. Since 1965 the ONR Ocean Science and Technology Division has provided approximately \$20,000 annually to NODC for data center support rendered to ONR contractors. ONR has always encouraged its contract scientists to deposit data and data inventories with NODC, and in 1973 this policy was formalized (Oceanavinst 3161.4A) as a contract requirement.		
Office of Naval Research, Maury Center for Oceanographic Science.	Dr. J. Brackett Hershey, director.			
Office of Naval Research, Earth Sciences Division.	Dr. Peter Badgley, director.			
Office of Naval Research, Ocean Science and Technology Division.	Mr. Gordon R. Hamilton, director.			
Naval Research Laboratory, Washington, D.C.	Capt. J. T. Geary, director.	Ocean data processing, analysis, interpretation, storage, and dissemination.	70.0	\$3,500
Naval Weather Service Command, Washington Navy Yard, Washington, D.C.	Capt. W. S. Houston, commander.	Global oceanographic analysis and predictions of select physical parameters and applications. Alpha-numeric and graphic formats of unclassified products suitable for civil use. Full range of data collection, processing, interpretation, storage, and dissemination.	330.0	2,887
Naval Air Development Center, Warminster, Pa.	Mr. Russell Mason, technical director (acting).	Ocean data collection, processing, analysis, interpretation, storage, and dissemination.	8.0	400

DEPARTMENT OF DEFENSE (NAVY)—Continued

Organization	Principal contact	Data activity capabilities	Fiscal year 1974 resources	
			Man-years	Amount (thousands)
Naval Coastal Systems Laboratory, Panama City, Fla.	Mr. G. G. Gould, technical director.	Inshore ocean data processing, analysis, interpretation, and dissemination.	8.0	\$300
Naval Ordnance Laboratory, White Oak, Silver Spring, Md.	Dr. W. C. Wineland, associate technical director for research.	Ocean data processing, analysis, interpretation, storage, and dissemination.	6.0	300
Naval Ship Research and Development Center, Bethesda, Md.	Dr. A. Powell, technical director.	Ocean data collection, processing, analysis, interpretation, storage, and dissemination.	3.0	150
Naval Undersea Center, San Diego, Calif.	Dr. Howard L. Blood, technical director.	Ocean data processing, analysis, interpretation, storage, and dissemination.	30.0	1,600
Naval Underwater Systems Centers, Newport, R.I., New London, Conn.	Mr. H. E. Nash, technical director.	Ocean data processing, analysis, interpretation, storage, and dissemination.	30.0	1,600
Naval Oceanographic Office, Suitland, Md.	Dr. B. E. Olson, scientific and technical director.	Collection, processing, storage, analysis, and dissemination of oceanographic and hydrographic data; includes the DOD Geomagnetic Data Library, other data files, and the preparation of oceanographic products in support of Navy planning and fleet activities.	335.0	7,500
U.S. Naval Postgraduate, Monterey, Calif.	Dr. Dale Lieper, chairman, Department of Oceanography.	Ocean data analysis, interpretation, processing, and dissemination.	2.0	50
Naval Air Systems Command Environmental Prediction Research Facility, Monterey, Calif.	Capt. Robert C. Sherar, commanding officer.	Analysis and interpretation of oceanographic data in support of research and development of oceanographic predictive models for operational use.	3.0	63

ENVIRONMENTAL PROTECTION AGENCY

Office of Research and Development, 401 M Street SW., Rm. 3202, Washington, D.C.	Mr. A. Trakowski, Jr., Assistant Administrator for Research and Development.	Administration		
Region I	Mr. John McGlennon, Regional Administrator, J. F. Kennedy Federal Bldg., Rm. 2203, Boston, Mass.	Administration		
National Marine Water Quality Laboratory, P.O. Box 277, West Kingston, R.I.	Dr. Eric Schneider, director (acting).	Data collection, analysis, interpretation, storage, and dissemination as relates to marine pollution and research.	2.0	\$50
Region II	Mr. Gerald M. Hansler, Regional Administrator, 26 Federal Plaza, Rm. 908, New York, N.Y.	Administration		
Edison Water Quality Research Laboratory, Edison, N.J.	Mr. Richard Dewling, director, surveillance and analysis laboratory.	Data collection, analysis, interpretation, storage, and dissemination as relates to ocean disposal baseline surveys.	5.0	125

Marine Geology, P.O. Box 1916, Corpus Christi, Tex.	Dr. L. E. Garrison.....	Data collection, analysis, interpretation, storage, and dissemination.	8.0	182
Marine Geology, Woods Hole, Mass.	Mr. John C. Behrendt, branch chief.	Data collection, analysis, interpretation, storage, and dissemination.	38.0	1,010
Water Resources Division, National Center, Reston, Va.	Mr. Robert Schoen.....	Collection, analysis, and dissemination of stream flow and water quality data of major discharges into bay, estuarine or ocean areas, including data activities in support of special estuarine or coastal zone studies.	193.0	1,925
Topographic Division, National Cartographic Information Center, National Center, 505, Reston, Va.	Mr. John Swinnerton, chief.	Computerized system for locating and obtaining maps, charts, cartographic and associated materials for the United States and its territories which include coastal regions, oceanic islands, and offshore areas.	3.5	80
Office of Water Resources Research, 18th and C Sts. NW, Washington, D.C.	Mr. Warren A. Hall, director.	Through grants, supports data activities of industries, academic groups, and States in coastal zone; manages Water Resources Scientific Information Center.	1.5	800

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

National Space Science Data Center, Goddard S.F.C., Code 601, Greenbelt, Md.	Dr. James I. Vette, director.	Collection of NIMBUS satellite remote-sensor-acquired sea surface radiometric data, storage, and retrieval of data and dissemination of data in form of digital data tapes or photo facsimiles.	6.0	\$100
------------------------------------------------------------------------------	-------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-----	-------

NATIONAL SCIENCE FOUNDATION

Office for the International Decade of Ocean Exploration, 1800 G St. NW., Washington, D.C.	Mr. Faenan Jennings, head.	Since its inception in 1970 the IDOE program has included a strong ocean data management administration as a matter of sound scientific practice as well as clear national policy. IDOE guidelines, requiring bilateral negotiations with the Environmental Data Service as a condition of the grant, predate the May, 1972 ICMSE data policy statement. IDOE investigators are principally located at research institutions having well established data capabilities for which appropriate support is provided in the research grants.

Division of Environmental Sciences, 1800 G St., NW., Washington, D.C.	Mr. Albert Crary, head.	In addition to the standard rights-in-data clauses in all NSF grants, DES issues a detailed letter to each grantee (since November, 1972) prescribing data arrangements to be made with appropriate national data centers. EDS is provided, semi-annually, an annotated list of NSF/DES grants for which data arrangements are probably of interest.		
Office of Polar Programs, 1800 G St. NW., Washington, D.C.	Mr. Kendall Moulton, acting deputy head.	In both Arctic and Antarctic oceanographic research support, grantees are urged to deposit physical oceanographic data with NODC. Some physical oceanographic information is filed with biological marine data at the Smithsonian Oceanographic Sorting Center. In all cases, the normal outlet is through publication in scientific journals which in themselves serve as repositories for data.		
Office of National Centers and Facilities Operations, National Ocean Sediment Coring Program, 1800 G St. NW., Washington, D.C.	Mr. Daniel Hunt, Jr., head.	The information handling system for the deep sea drilling project (OSDP) is operated by Scripps Institution of Oceanography. Data are distributed to requesters as printouts, photographs, computer plots, punched cards, and magnetic tapes, in addition to the regular publication of the initial reports of the deep sea drilling project, the initial core descriptions, and a series of technical reports. The system is expected to be expanded during the international phase of ocean drilling extension (1975-80) and will be especially designed to (1) process data for inclusion in the published initial reports of the deep sea drilling project; (2) produce a published guide to OSDP core material; (3) produce standardized presentations of data for each drill site; (4) assist in core repository management.		

SMITHSONIAN INSTITUTION

Center for Short-Lived Phenomena, Cambridge, Mass.	Mr. Robert Citron, director.	Descriptions of nature and location of short-lived events of scientific interest (sea floor landslides, earthquakes, animal migrations, storm surges, new islands, volcanism, oil spills, fish kills, marine mammal beachings and migrations, tsunamis, etc.) are relayed to CSLP. Data cards prepared and indexed for retrieval and immediate notification of events sent to subscribers in each category. Contract level is \$24,000.	2.0	\$40

V. REFERRAL SERVICES

Organizations listed in Parts I and II are not repeated in this list. Most, if not all, also perform referral services.

ARCTIC BIBLIOGRAPHY PROJECT

Arctic Institution of North America, 3458 Redpath Street, Montreal, P.Q. Canada 109. Maret Martna (Miss), Editorial Project Director. Reference, referral, abstracting and indexing services/Arctic research.

ARCTIC ENVIRONMENTAL INFORMATION AND DATA CENTER

University of Alaska, 707 A Street, Anchorage, Alaska 99501. David Hickok, Director. Reference and referral services, literature searches/Arctic, Alaska environment.

BERNICE P. BISHOP MUSEUM PACIFIC

Scientific Information Center, Post Office Box 6037, Honolulu, Hawaii 96818. Edwin H. Bryan, Jr., Manager. Reference and referral services/Pacific area.

CHEVRON OIL FIELD RESEARCH COMPANY

Technical Information Center, Post Office Box 446, La Habra, California 90631. H. K. Phinney, Jr., Supervisor. Reference, referral and literature searching services/oil field research technology and marine environment.

COASTAL COORDINATING COMMITTEE INFORMATION SECTION

309 Magnolia Office Plaza, Tallahassee, Florida 32301. Referral and information services/coastal zone activities.

COASTAL RESOURCES AND SCIENCE SERVICE CENTER

Division of Marine and Coastal Zone Management, Department of Environmental Conservation, State of Alaska. Pouch O, Juneau, Alaska 99801. Technical information coastal ecosystems.

CIVIL ENGINEERING LABORATORY TECHNICAL LIBRARY

Civil Engineering Laboratory, Department of the Navy, Department of Defense, Port Hueneme, California 93041. Frances Rugen, Librarian. Reference service, literature surveys/materials in the marine environment.

EUTROPHICATION INFORMATION PROGRAM

Water Resources Center, University of Wisconsin, 1975 Willow Drive, Madison, Wisconsin 53706. Dr. Paul D. Uttormark, Director. Reference, abstracting services, bibliographic services, analysis and evaluation/Great Lakes chemical, biological, and hydrological processes.

GEOLOGICAL DATA CENTER

University of California, San Diego, California 92038. T. E. Chase. Reference/Pacific Ocean geological and geophysical data from Scripps Institution of Oceanography.

GREAT LAKES COMMISSION INFORMATION SERVICES

2200 North Campus Boulevard, Ann Arbor, Michigan 48105. Albert Z. Ballert, Director of Research. Reference and referral services and data compilation/Great Lakes water resources.

INFRARED INFORMATION AND ANALYSIS CENTER

Environmental Research Institute of Michigan, P.O. Box 618, Ann Arbor, Michigan 48107. Dr. George Zissis, Director. Research, referral technical analysis and evaluation, literature surveys/remote sensing.

INSTITUTE FOR THE DEVELOPMENT OF RIVERINE AND ESTUARINE SYSTEMS (IDRES) INFORMATION CENTER

Science Information Services, Franklin Institute Research Laboratories, Benjamin Franklin Parkway at 20th Street, Philadelphia, Pennsylvania 19103. Patricia A. Devlin, Project Leader. Information, referral, and literature search services/estuarine research, particularly the Delaware River Basin.

INSTITUTE OF POLAR STUDIES

Ohio State University, 125 South Oval Drive, Columbus, Ohio 43210. Dr. Emanuel D. Rudolph, Director. Reference, analysis and evaluation, technical data compilation/Arctic and Antarctic Regions, ice, geology, botany, and zoology.

INTERNATIONAL OCEANOGRAPHIC FOUNDATION

10 Rickenbacker Causeway, Virginia Key, Miami, Florida 33149. F. May Smith, Executive Secretary. Information and referral services/oceanology (popular).

INTERNATIONAL TSUNAMI INFORMATION CENTER

2525 Correa Road, Honolulu, Hawaii 96822. Gaylord R. Miller, Director. Reference/Tsunamis, historical data and bibliographic services.

MARINE BIOLOGICAL LABORATORY LIBRARY

MBL Street, Woods Hole, Massachusetts 02543. Reference and referral services/ocean sciences, especially marine biology.

MARINE RESOURCES INFORMATION CENTER (MARIC)

Massachusetts Institute of Technology, Cambridge, Massachusetts 02139. Mrs. Barbara Passero, Information Manager. Reference and referral services/marine resources, aquaculture, fisheries technology, law of the sea, ocean engineering.

MARINE TECHNOLOGY SOCIETY

1730 M Street, NW., Suite 412, Washington, D.C. 20036. Mrs. Libby Wallace, Executive Director. Reference and referral services/ocean science and marine technology.

MUSEUM OF COMPARATIVE ZOOLOGY

Harvard University, Oxford Street, Cambridge, Massachusetts 02138. Reference and referral services/zoology, sedimentation, oceanography.

NATIONAL EARTHQUAKE INFORMATION CENTER

Environmental Research Laboratories, Earth Sciences Laboratory, Building R10/S, Boulder, Colorado 80302. James L. Land, Director. Reference and referral, data compilation, technical evaluation and analysis/seismology and earthquakes.

NATIONAL OCEANOGRAPHIC INSTRUMENTATION CENTER

National Oceanic and Atmospheric Administration, U.S. Department of Commerce, Rockville, Maryland 02852. Gilbert Jaffe, Director. Research and analysis/oceanographic instrumentation.

NATIONAL REFERRAL CENTER

Science and Technology Division, Library of Congress, Washington, D.C. 20540. John Price, Assistant Chief, Reference and Referral Services. Referral services/ocean sciences.

NAVAL AIR DEVELOPMENT CENTER

Warminster, Pennsylvania 18974. H. B. McCaulley, Captain, U.S.N., Director. Reference, referral, research/ocean surveillance.

NAVAL AIR ENGINEERING CENTER

Philadelphia, Pennsylvania, T. F. Lechner, Captain, U.S.N. Director. Referral, technical analysis and evaluation/oceanology.

NAVAL ORDNANCE LABORATORY

White Oak, Maryland 20910. Dr. W. C. Wineland, Associate Technical Director (Acting). Reference, technical analysis, referral/underwater sound and acoustics.

NAVAL POSTGRADUATE SCHOOL

Monterey, California 93940. George R. Luckett, Librarian. Reference, referral, literature survey, SDI services/oceanography.

NAVAL UNDERWATER SYSTEMS CENTER TECHNICAL LIBRARY

Naval Underwater Systems Center, Department of the Navy, Department of Defense, New London, Connecticut 06320. William F. Saars, Acting Director (203). Reference services, literature survey/underwater research.

OCEAN LIBRARY AND INFORMATION CENTER (OLIC)

P.O. Box 2369. La Jolla, California 92037. Ellen M. Sneberger, Librarian. Reference, bibliographic services/ocean sciences.

OCEAN SCIENCE INFORMATION CENTER

Hamilton Library 205, University of Hawaii, Honolulu, Hawaii 96822. Barbara Tillett, Director. Reference and referral services/ocean sciences.

OFFICE OF THE OCEANOGRAPHER OF THE NAVY, MANAGEMENT INFORMATION DIVISION

200 Stovall Street, Alexandria, Virginia 22332. Raymond D. Hagen, Director. Referral/oceanographic activities of the United States Navy.

OFFICE OF WATER DATA COORDINATION

U.S. Geological Survey, National Center 417, Reston, Virginia 22092, Russel H. Langford, Chief. Referral services/water resources and data.

OIL SPILL INFORMATION CENTER

University of California, Sciences Engineering Library, Santa Barbara, California 93106. Information, referral, and bibliographic services/offshore oil spills, oil pollution in the marine environment, oil spill control measures.

REGIONAL INFORMATION AND COMMUNICATION EXCHANGE

Fodreu Library, Rice University, P.O. Box 1892, Houston, Texas 77001. Reference, literature searching and referral services/ocean sciences, gulf coastal areas.

SMITHSONIAN SCIENCE INFORMATION EXCHANGE

Room 300, 1730 M Street, NW., Washington, D.C. 20036. David F. Hersey, Director. Information/scientific research projects (1965 to present).

TECHNICAL INFORMATION SECTION, COLD REGIONS RESEARCH AND ENGINEERING LABORATORY

CRREL-71, P.O. Box 282, Hanover, New Hampshire 03755. Wesley Pretkiewicz, Director. Reference and referral services, bibliographic compilations/ice, Arctic Regions, Antarctic Regions.

THE OCEANIC FOUNDATION

Makapuu Point, Waimanalo, Hawaii 96795. Dr. H. Burr Steinbach. Reference, referral and bibliographic services/marine biology, ecosystems.

UNDERSEA MEDICAL SOCIETY

9650 Rockville Pike, Bethesda, Maryland 20014. Dr. C. W. Shilling, Executive Secretary. Reference, referral, and literature searching services/underwater medicine.

WATER RESOURCES CENTER ARCHIVES

University of California, Berkeley, California 94720. Gerald J. Giefer, Librarian. Reference/ocean engineering, oceanography.

WATER RESOURCES ECONOMICS INFORMATION PROGRAM

University of Wisconsin, 1513 University Avenue, Madison, Wisconsin 53706. Leroy G. Zweifel, Director. Referral, abstracting, literature surveys/water resources.

WATER RESOURCES SCIENTIFIC INFORMATION CENTER

Office of Water Research and Technology, U.S. Department of the Interior, Washington, D.C. 20240. Raymond A. Jensen, Manager. Reference and bibliographic references/water research.

WILLIAM T. CLAPP LABORATORIES

Battelle Memorial Institute, Washington Street, Duxbury, Massachusetts 02332. Reference, referral, and literature searching services/ocean sciences.

WORLD DATA CENTER A, OCEANOGRAPHY

World Data Center A, Oceanography, National Oceanic & Atmospheric Administration, Washington, D.C. 20235. Ronald E. Moffatt, Associate Director. Data compilation, referral/oceanographic data, marine geology, marine biology.
